

SOLAR HOT WATER FOR STAND ALONE SYSTEMS

Heat your water by diverting waste energy in a battery PV system

Jackal

- Finds and scavenges waste energy.
- Can work on any off grid battery system with any: energy source, inverter, charge controller (AC or DC coupled, PWM, MPPT) and electric tank.
- Simple installation by any electrician.
- Huge boost to overall system efficiency.
- Year round hot water with adequate array.
- Preheater for gas.
- Complement for wood fired.
- Can boost existing solar HW.
- 5 Year warranty.
- Made in Australia.
- Australian standards compliant.
